## **DETAILED ACTION**

# Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 15<sup>th</sup>, 2006 has been entered.

# Response to Arguments

Applicant's arguments with respect to claims 14 and 25 have been considered but are moot in view of the new ground(s) of rejection.

#### Information Disclosure Statement

The information disclosure statement filed April 20<sup>th</sup>, 2006 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because no translation of French document 2,750,852 has been provided. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

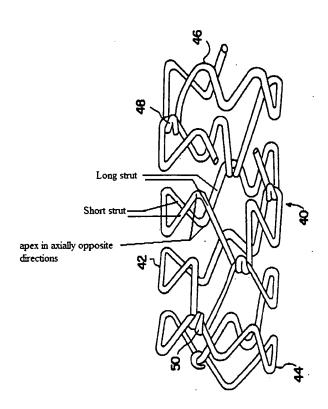

Claims 1, and 14-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiktor (U.S. Patent Number 5,133,732).

Regarding claim 1 Wiktor discloses a plurality of hoops disposed in a helical succession along the axis of the stent wherein each of the hoops comprise a helical arrangement of elements defined by a successive series of straight struts connected by apex sections alternately pointing in opposite axial directions. Furthermore, at least one connecting member (32) is disposed between the first hoop and an adjacent hoop, the connecting member comprising a bridge member welded to both a first strut and second strut. See Figure 7.

Regarding claims 14-28 Wiktor discloses a stent (40) having a helical arrangement of elements with struts (42, 44) and apex sections (48) as is claimed (figure 8, column 3 lines 47-68, column 4 lines 1-9 and column 7 lines 12-24). Furthermore, as demonstrated below, Wiktor discloses two struts, one longer than the other, that lie on a common cylindrical surface having a common radius relative to the longitudinal axis of the stent wherein the aforementioned struts combine to comprise the generally uniform and non-uniform apex sections.

Application/Control Number: 10/747,848

Art Unit: 3738

## Allowable Subject Matter

Claims 2-13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Izquierdo whose telephone number is 571-272-1943.

The examiner can normally be reached on Monday through Friday from 8:00 am until 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/747,848 Page 5
